Frost-proof Outdoor Valve

389,00 € (Incl. VAT, ad. delivery)

Dimension: B=9,5, H=10,5, T=10,0 cm. weight: 2.30 kg

COLOR CHART

- Toskana-brown

Frost-protected exterior wall valve set in Bronze

With Nose to Attach the Watering Can including Backflow prevents And Pipe Ventilators.

Ideal for Historical Buildings in The Protection Of monuments.

Simple Assembly including Fastening Material for Wall Thicknesses from 13 to 50 cm, suitable for Shell Construction with later Fine installation or immediate complete Assembly.

This Outdoor Faucet with Frost protection in the Wall performance, is approved according to DVGW VP 648 for drinking Water PN 10-temperature resistance up to 90°C-with built-in Safety combination HD according to A4 EN 1717 (Backflow vunder And Pipe Ventilator) or A4 1988-4.

Frost-proof Outdoor Valve

When Water freezes to Ice, it increases about 10% in Volume. This Increase in volume is automatically absorbed in our frost-proof outer Wall Valve by an integrated Volume Compensator in the Wall tube. A Cordoning off and Emptying of the Line is therefore no longer necessary in the event of a Risk of Frost. The Volume Compensator Must be in a frost-proof Area.

Due To the System, the Outer Wall valve Can freeze with a longer strong Frost Effect. Water Abstraction is not possible in this Case.
